Design code	3409-01
Also available ColorFill	CF230
Upstand	No
Splashback	No
Sheet laminate	Yes

Specification	
The Tradeline high pressure decorative laminate surface is manufactured to EN438, and is inherently heat, moisture and UV resistant. The surface also provides protection from impact and is highly resistant to wear	
10mm corner radius to top and bottom edges	
The substrate is a high density chipboard manufactured to EN312 part 3 P2 grade	
The rear edge is sealed against moisture ingress with an injected hot melt wax	
A resin impregnated foil is applied to the underside of the worksurface to offer moisture resistance	
The decorative laminate is wrapped under the worktop to provide a drip barrier against water ingress	
The underside of the worksurface is rebated along the full length and a polyurethane resin is inserted to act as an additional moisture barrier	
Worktops are supplied with a half length laminate edging strip	
New easy to handle breakfast bars (2025 x 900 x 40mm)	

## Finishing touches

A select range of matching splashbacks and upstands is available for the perfect finish to your worktop, together with many other accessories.
